SUBJECT INDEX TO VOLUME 42

A

A1B8Cw7DR3 phenotypic combination, association with longevity in males, 978
Abstracts, 116, 229, 1222
American Geriatrics Society, 51st Annual Scientific Meeting
American Federation for Aging Research, 15th Annual Scientific Meeting, SA1
Academic gerontology, changes in the field, 1963–1993, 1123
Activities of daily living (ADL)
effect of visual impairment, 287
as predictor of mortality from cancer, stroke, and heart disease, 153
Activity, physical, and decrease of insulin-like growth factor-I in healthy older men, 71
Acute care for the elderly
geriatric inpatient units, challenges faced under Medicare prospective payment system, 553
medical unit, dedicated, description of program, 545
Admission, emergency, predictors of 6-month mortality, barriers to use of patient preference, DNR orders, recommendations, 1277
Adverse and unexpected events, falls and non-fall-related injury, medication-related events, wandering episodes in the long-term care setting, 33
Affective state, effect on subjective memory complaints, 1
Age
and chemotherapy treatment for small cell lung cancer, 64
coronary artery bypass surgery use, Systolic Hypertension in the Elderly Program, 1143
hypothyroidism, differences in presentation, 984
myocardial infarction, acute, differences in treatment related to patient age, 826
neutrophil levels and body's ability to activate neutrophils, 77
relationship to eligibility for thrombolytic therapy in acute myocardial infarction cases, 127
stroke rehabilitation, effect on, 39
Aggression, older persons with dementia, 192
Aging
pilots, and alcohol, effects on flight simulator performance, 577
postural control, 93
research on, goals, future directions, relevance to geriatric care for best possible quality of life, Irving Wright Award Lecture, AFAR, 1214
Alcohol, aging and, effects on pilot performance with flight simulators, 577
Alzheimer disease. *See also* Dementia
advanced, dementia special care unit, impact on patient discomfort and cost, 597
anesthesia, multiple exposures to, as potential risk factor for, 198
cobalamin levels, 132
death, causes, association with cognitive impairment, 723
deterioration, measurement, modified Ordinal Scales of Psychological Development compared with Functional Assessment Staging, 1266
early symptom patterns, comparison with reporting of symptoms similar but not related to AD, comorbidity, 517
ethical issues related to presymptomatic and prenatal genetic testing, 782
fracture risk, 614
oral health of AD patients, a longitudinal study, 57
progression, oral temperature changes, possible association, 1218
treatment research, reasons for optimism, 679
vitamin B_{12}, association with deficiency not found, 933
Ambulatory activity
predictor of mortality from cancer, stroke, and heart disease, 153
Amino acid copolymer membrane, hydrocolloid dressing compared, local treatment for pressure sores, elderly men, 1180
Anesthesia
multiple exposures to, as potential risk factor for Alzheimer disease, 198
letter responding to article, 908
Anginal perceptual threshold, influence of autonomic function and, on silent exertional myocardial ischemia, 732
Angiotensin converting enzyme (ACE), captopril, inhibitor of ACE, effect on renal blood flow, association with sodium intake but not with age, 805
Anthropometric measures, laboratory nutritional indicators and, as predictors of mortality in nursing homes, 1167
Antipsychotics, nursing home, prescribing, effects of OBRA 87 on, 648
Antithyroid drugs, hyperthyroid Graves' disease, older patients responding more favorably than younger, 513
Aspirin therapy, cardiovascular events, primary *vs.* secondary-only prevention, 12-month trial, assessment, 643
Assessment
home, after hospital discharge
evaluation, description of clinical problems identified, 1229
recommendations, response to research, editorial, 1303
Minimum Data Set, use, inclusion in OBRA 87 procedures supported, editorial, 1212
quality of life, outpatients, telephone *vs.* face-to-face contact, survey, 1295

B

Bacteria, antibiotic-resistant, colonization and infection, long-term care facility, 1062
Balance. *See also* Sway, Postural control
mobility and, comparison of clinical and biomechanical measures in nursing home residents, 493
perturbations, differences in stepping responses by older and younger women, 506
postural control among elderly, 93
Barium enema, septicemia associated with, 570
Behavior
nursing home patients with dementia, agitated, carbamazepine as treatment, preliminary study, 1160
physically aggressive, in older persons with dementia, 192
Benign prostatic hyperplasia, prostatic stent use in high risk patients over 80, 1004
Bleeding. *See* Hemorrhage
Blinking, release reflexes and, usefulness in bedside neurological examination, 609
Body mass index, functional capabilities of community-dwelling elderly, relationship, 368
Body weight, nonambulent elderly patients, nomograms as safe and easy means, 763
Book reviews, 119, 232, 459, 572, 690, 800, 910, 1029, 1135, 1309
Breast cancer, treatment with partial mastectomy and radiation, 150
Breast irradiation, tolerance in older women, 150

C

Calcium, metabolism, effects of thiazide diuretics, 1133
Carbamazepine, dementia, treatment for agitation, nursing home, preliminary study, 1160
Cardiopulmonary resusciation, hospitals, favorable outcome, 137
Cardiovascular events, primary *vs.* secondary-only prevention with aspirin therapy, a 12-month trial and implications for future trials, 643
Caregivers, perception of patient functioning and experience of burden, 308
Carotid sinus massage, diagnostic, in cases of syncope, neurological complications after, incidence, 1248
Case-finding tools for depression, performance in nursing home setting, 1103
Case managers, relationship with physicians, 5
Catheterization
multiple isolates with use, *vs.* voided urine, 569
urethral, long-term, risks
preventive methods not proven, care in decision-making urged, editorial, 1304
pyelonephritis and renal inflammation, chronic, association, 1286
Caudal epidural blocks, lumbar canal stenosis, pain relief from, 593
Chemotherapy, age as a factor in success as treatment for small cell lung cancer, 64
Chronic disease, health status and, relationship to health services utilization, community-dwelling older Americans, 1087
Chronic diseases
Ciproflaxin. *See* Fluoroquinolones
Circadian patterns, incidence of falls and other injuries in a long-term care setting, relationship, 33
Clinical trials in the elderly, importance of, difficulties associated with, 682

Coagulation, inflammation and, functional implications of elevated D-dimers, racial/ethnic and gender differences, 738
Cobalamin, decreasing levels with aging, and possible relationship with Alzheimer disease, 132
Cognition, Minimum Data Set Cognition Scale, dementia assessment, nursing home, validation, 1173
Cognitive function. *See* Function, cognitive
Committee on Strengthening the Geriatric Content of Medical Training, 559
Communication, third person present at physician/older patient interview, effects, 413
Community-based care, long-term, effects, 348
Comorbidity, Alzheimer disease, and reporting behavior among patients who will and those who will not be diagnosed, 517
Competence, patient, evaluation of physician use of the legal standard for determining, 1074
Compliance, polypharmacy behavior of geriatric patient, impact on outcome, 1027
Complications, neurological, carotid sinus massage, diagnostic, 1248
Comprehensive geriatric assessment
  difficulty in assessing and modifying, editorial, 1130
  evaluation of consultation program, multi-center trial including hospitalized patients in an HMO, 536
Confusion, and relationship to post-hospitalization falls, 269
Congestive heart failure
  echocardiography recommended in all cases with elderly, commentary, 1360
  effect on ability to walk at a steady pace, self-determined rate, 1056
Congress of Clinical Societies, Futility in Clinical Practice, report on, 861
Constipation
  dietary, psychological, and physiological factors in, 701
  prescription and utilization patterns among institutionalized elderly, recommendations for assessment and management, 947
  treatment, docusate, prescription habits of physicians, 571
Coronary artery bypass surgery, age, race, and gender variation, use, Systolic Hypertension in the Elderly Program, 1143
Cortical system and postural control, 93
Costs
  drugs, physician knowledge of, 992
  futility guidelines, prognosis-based, analysis, implications for patient and family, 1202
  hospital, associated with admission via emergency department, trial for reducing costs, 1045
CPR, nursing home patients, alternatives, ethical issues, research findings, 797
Curriculum, nursing home, component of internal medicine and family practice residency, recommendations, content, instruction, evaluation, 1200

D

Day hospitals, geriatric, comprehensive geriatric assessment, evaluation, 1094
D-dimers, markers of coagulation and inflammation, elevated, racial/ethnic and gender differences, effects of age and physical functioning, 738
Death, causes associated with Alzheimer disease and cognitive impairment, 723
Death Certificate, The, short story based on a composite of real situations, 442
Decision-making
  cases of dementia with life-threatening illness, projecting patient preferences regarding intervention, 997
  last 6 months of life, 303
Dehydration
  death and, during febrile episodes in nursing homes, incidence and recommendations, 968
  indices of, evaluation of consistency of standard laboratory measures, frail nursing home patients, 1070
Dehydroepiandrosterone sulfate, association with poor cognitive function assessed, 420
Delirium
  hospitalized older persons, rate of, outcome associated with, predictors of, model for predicting, 809
  recognition of by nursing home staff, 252
Dementia
  Alzheimer type
    diagnosis with DAT Inventory, 16
  carbamazepine as treatment for agitation, nursing home, preliminary study, 1160
  cognitive function in old and very old, relationship to age and education, 766
  deterioration in Alzheimer disease, measurement difficult in late stages, 2 methods compared, 1266
  ethical justification for nonaggressive management of illnesses, issues of comfort and goals of treatment, 686
  life-threatening illness with, projecting patients' preferences regarding intervention, 997
  Minimum Data Set Cognition Scale, development, validation, 1173
  predeath service use by patients with a family caregiver, patterns, 719
  qualitative assessment, *vs.* quantitative, 798
  sodium valproate, effect on disturbed behavior, 906
  special care unit focused on Alzheimer disease, impact on patients' discomfort and costs, 597
Depression
  effect of, on functional and cognitive impairment in patients with Alzheimer disease, 186
  health services use and, longitudinal study in elderly primary care patients, 833
  late life, attempts by physicians to improve treatment, 839
  late *vs.* early onset, correlation with lifetime personality disorder, 727
  nursing home setting, performance of case-finding tools, patient factors affecting, 1103
  rehospitalization after antidepressant and electroconvulsive therapy, rate, possible predictors, 1282
  screening for, single question *vs.* Geriatric Depression Scale, 1006
  weight loss in nursing home, depression as cause of, 583
Devices, assistive, falls, post-hospitalization, effect of devices on incidence, 269
Dexterity, oral care, predictor of ability, 1081
Diabetes
  motor vehicle operation, association with accidents and recommendations for improving, 695
  self blood glucose monitoring, reliability of, 779
Diabetes mellitus
  control of, impact on progression of retinopathy, 142
  non-insulin-dependent, risk factors for requiring treatment, 1235
Diabetic neuropathy, treatment, possible, case studies, 570
Diabetic retinopathy, lipoprotein(a) as independent risk factor, 965
Diagnostic classification
  medical-surgical classification, 11
  mortality, nursing home use, daily activities, charges for subsequent medical services, effect of classification on, 11
  rehabilitation classification, 11
Diet, prescription, malnutrition among nursing home patients on restricted diets, 1100
Disability
  after stroke, age-related factors involved, 39
  disease and, editorial, 1128
  evaluation of, and role of primary care physician in rehabilitation, 341
  risk factor for gastrointestinal bleeding in community-dwelling older persons, 816
  self-reported causes, underlying disease, Cardiovascular Health Study, 1035
Disease
  disability and, relationship, editorial, 1128
  function and self-perceived health among very frail elderly, association with disease, 374
  postural control, association, 103
  predictor of elder suicide, possible, 174
Disease-related variables as predictors of institutionalization, 181
Diuretics, thiazide, effects on calcium metabolism, 1133
Diverticular disease, peritoneal dialysis, continuous ambulatory, elderly, 569
Dizziness
  chronic, in patients age 60 and older, psychological factors associated with, 847
  men, elderly, causes varied, not often psychophysiologic, relatively incapacitating compared with youth, 1184
Do-not-resuscitate (DNR) orders
  decisions made in last 6 months of life, 303

life-sustaining treatments and, policies, Canada, long-term care facilities, survey, 1150
Dying, pain management in, importance of educating health care providers, 1217
Dysphoria, history of, social support network, and coping choices, impact on bereavement process, 712

E

Echocardiography, congestive heart failure, recommended treatment in all cases with elderly, commentary, 1300
Education
cognitive function, association with among old and very old residents, 766

Syncope, carotid sinus massage, incidence of neurological complications after, 1248
  epidemiology, pathophysiology, etiology, diagnostic evaluation, 426
Systolic Hypertension in the Elderly Program, age, race, and gender variation, use of coronary artery bypass surgery, 1143

T

T lymphopenia, idiopathic $CD4^+$, association with malnourishment, retrospective chart analysis, 1291
Temperature, oral, Alzheimer patients, cognitive decline, possible association, 1218
Testing for postural control, 93
Testosterone, human growth hormone and, as treatment for hyposomatotropism and hypogonadism in elderly men, unanswered questions, 522
Tests
  Geriatric Depression Scale, validity when used for nursing home populations, 490
  Timed Manual Performance, usefulness as predictor of hospitalization and death, 21
Tetanus
  immunization urged for prevention, 1305
  74-year-old woman, case study, discussion of prevention policies, 424
Thiazide diuretics, effects on calcium metabolism, 355, 1133
Thrombolytic therapy in acute myocardial infarction cases and patient age, 127
Timed Manual Performance Test. *See* Tests
Toxicity, in older women undergoing breast irradiation, 150
Traffic, dangers for elderly pedestrians, suggestions for alleviating, 444
Traffic signals, and walking speed of elderly, 241
Treatment seeking for urinary incontinence, predictors of, 208
Triage, emergency, to intensive care, 6-month mortality predictors, barriers to use of patient preferences, 1277
Tubes, feeding, surrogate decision-makers' satisfaction with use of, 161

U

Ulcers, decubitus, elderly men, treatment with amino acid copolymer membrane *vs.* hydrocolloid dressing, 1180
Ultrasound, device, portable, measuring post-void residual volume, incontinent nursing home residents, 1189

V

Vaccination. *See* Immunization
Vaccines, hemagglutinin-subunit vaccine on influenza, efficacy of, 245
Vasopressin, arginine, concentrations in plasma, effects of aging, gender, and serum osmolality, 399
Vestibular system and postural control, 93
Visual impairment, association with mobility and physical function, 287
Visual system and postural control, 93
Vitamin B_{12}, association with dementia or Alzheimer disease not found, 933

W

Walking, variability, increased, in elderly persons with congestive heart failure, 1056
Walking speed, potential for injury while crossing the street, 241
Wandering episodes, epidemiology, long-term care setting, 33
Weight loss, nursing homes, causes, 581
Withdrawal, antipsychotic medications, 280
Women
  falling, physiological factors associated with, community-dwelling women, 1110
  impaired function, demographic, physiological, and lifestyle correlates of, 481
  lower extremity arterial disease, functional status and mobility, 923
